HOW CHARTER SCHOOLS CAME TO WA STATE

What took place in WA state to get Charters approved happened in every state that has adopted them. And I AM SURE the politicians were paid handsomely for their support. Now why do you think all these wealthy people fought so hard and gave so much of their money (\$10 MILLION) to get Charters into WA state? Because they love your children? Not on a bet. They did it because the centralization of education is a cash cow and they are all hoping to cash in and they will unless we stop them. You see they are in partnership with the federal government. They do the dirty work for the government and they get

IF YOU'RE NOT OUTRAGED YOU'RE NOT PAYING ATTENTION

INTERVIEW WITH CHARLOTTE ISERBYT

If this short 23 minute interview doesn't make people stand up and really think I don't know what will. She Know what she is talking about and if we fail to listen we will look back someday and be very sorry that we let ourselves be led to slaughter. be very sorry someday. Time is not on our side. If not us, Who? If not now, When?

US SENATORS DENOUNCE COMMON CORE

Please read the attached resolution authored by Sen. Graham from SC. I called his office last week and asked why a do nothing resolution instead of a bill. I was told they merely want to draw attention to the issue. I told his education aide what we need is ACTION. Well I guess a resolution is better than nothing. So be sure to use

their work. It is called corporate Fascism. Public Private Partnerships (PPPs) Charters and VoucherS are every bit (I believe worse) as dangerous as Common Core and it will be our next battle. Next session we must get a brave Rep. and Senator to repeal Charters in Tennessee and my research has already begun.

PLEASE LISTEN TO THIS INTERVIEW

This woman knows what she is talking about. You can hear the desperation in her voice because she knows we are at a critical time in our country. She KNOWS the history and has the documents to prove EVERY word she says. I have spent a lot of time with her and we should be listening to her words and listening to what she knows instead of people like Mark Levin or people from Heritage, Freedom Works, Heartland etc. Choice will eventually take us to absolutely no choice, no power, no control, no freedom. Her interview starts at the 8 minute mark. Listen carefully. She talks fast. She has been trying to warn people

Democrat and Republican Representative and Senator on Saturday, Feb. 8th. **You might want to call your US Senators and ask them to sign on to this resolution ASAP.**

MY RESPONSE TO FREEDOM WORKS EFFORTS TO PRIVATIZE EDUCATION

Not another penny or word of support with FW get from me. ANY organization that supports Vouchers, Choice or Charters is not on our side. Remember Heritage is responsible for NAFTA. Now do you think they are on the side of America. And they are not the only group posing as conservatives but are actually controlled opposition.

WHY IS TECHNOLOGY IN THE CLASSROOM NOT A GOOD IDEA

I know it is so cool to have the latest electronic gadgets and we don't want to be called old fashioned. But there are some things parents need to understand about where we are going with technology in the classroom. Businesses like Microsoft see the benefit to their bottom line. The government sees it as the opportunity to change the values, thoughts, minds and behaviors of our children and teachers. Bill Gates is heavily funding cameras in every classroom. Oh of

saying is proving to be true and the end game is almost here unless we stand up and fight Choice/Charters/Vouchers. The state of Tennessee is pushing this agenda forward and Race To The Top was the catalyst. B.E.S.T.....what we can control and manipulate through the use of technology in schools from 1981. Charlotte exposed BEST and was fired for exposing their plan to control education and our children.

[INTERVIEW ARTICLE](#)

communities lie. They target the vulnerable groups because how could anyone refuse to help poor children anywhere. It is all a lie and they could care less about the poor children. They care about government control and the foundations getting rich doing the government's dirty work.

teachers or elevating the education standards in the world. He cares about making money and the government wants to control everything we do and think. This is a marriage made in heaven. If you have never read "1984" I think it might be time to get a copy from the local library. When was the last time you reviewed the books your children use in school? When was the last time you even saw one of your child's school books? When everything they see and do is in that TAX PAYER funded IPAD or computer how much control do you think you will have? And "they" know it. Once they have everything in the computer they control what your children feel, believe and learn. Also, think about the health affects on a young developing brain that constant exposure to WiFi will have. Studies indicate this exposure is extremely bad. France has discontinued the use of WiFi in the classroom because of the possible affects of constant exposure. Another issue.....the constant use of computers in itself dumb down our kids. They lose the ability to think, to figure it out. Well what happens when they cannot fire up the IPAD to get the answer to figuring out a discount at the store? Did you ever watch a young cashier try to figure out change when the computer isn't working? Did you ever watch their face when your bill comes to \$10.11 and you give them \$10.16? We have a good friend that owns a business and said he actually has to run training classes on how to make change. Check the new Common Core Standards. Is there anything in there about teaching kids to make change????? Oh that's ok we will just look it up on the computer or use our calculator to figure it out for us. We are destroying our children's ability to THINK. So with all this talk about "critical thinking skills" do they even have a clue what real "critical thinking skills" are all about or are they just 3 really cool sounding words?? Listen to the short video by a 9th grader from a school in TX. This is the kind of child they want to destroy. They don't want kids like him. You know kids who question and think. And then stand up and speak out. They want obedient soldiers.
